## Instructions for Completing CAPF 160 - Deliberate Risk Assessment Worksheet

<p><b>1. Activity:</b> Briefly describe the overall Activity for which the deliberate risk assessment is being conducted (e.g., SAREX, Wing Encampment, NCSA, etc.).</p>	<p><b>10. Overall Risk After Controls Are Implemented:</b> Assign an overall residual risk level. This is the highest residual risk level (from block 9). NOTE: Any activity with residual risk identified as "EH" or "H" must be approved by CAP/CC.</p>
<p><b>2. Date:</b> Self Explanatory.</p>	
<p><b>3. Prepared By:</b> Information provided by the individual conducting the deliberate risk assessment for the activity.</p>	<p><b>11. Supervision Plan and Recommended Course of Action:</b> Completed by preparer. Summarize the overall risk management plan for the Activity, including identification of individual responsible for on-going evaluation of plan and supervision of real time risk management.</p>
<p><b>4. Sub-Activity or Specific Task:</b> Use a separate block to describe each sub-activity or task. Examples might include Obstacle Course, PT Test, Aircraft Parking, or other tasks that are a part of the overall Activity.</p>	
<p><b>5. Hazard:</b> Specify hazards related to the subtask in block 4. There may be multiple hazards associated with each sub-activity. Use a separate row for each hazard.</p>	<p><b>12. Approval/Disapproval of Activity:</b> The leader in charge of the event (Activity Director, Commander, Incident Commander, etc.) approves or disapproves the Activity based on the overall risk assessment in Block 10.</p>
<p><b>6. Initial Risk Level:</b> Determine probability and severity. Using the risk assessment matrix (page 3), determine level of risk for each hazard specified, using probability and potential severity. Enter resulting Risk Level in this column.</p>	
<p><b>7. Control:</b> Describe or explain the risk controls or methods to be used to reduce the risk level associated with the hazard identified in block 5.</p>	<p><b>13. Risk Assessment Review:</b> For on-going activities, the approval authority (Block 12) should appoint individuals with sufficient oversight of the activity to periodically review risk controls to determine if they are effective or if overall risk has changed. If the overall risk rises above the level already approved, operations should cease until the appropriate approval authority is contacted and approves continued operations. Signature signifies review complete and event continues as planned.</p>
<p><b>8. How to Implement / Who Will Implement:</b> Briefly describe how each control will be implemented and the name of the individual who has primary responsibility for implementing and monitoring the risk control.</p>	
<p><b>9. Residual Risk Level:</b> Assuming the controls will be effective, determine the residual risk level based on the predicted probability and possible severity with the controls in place. NOTE: Any residual risk identified as "EH" or "H" must be approved by CAP/CC.</p>	<p><b>14. After-Action Feedback and Lessons Learned:</b> Provide specific input on the effectiveness of risk controls and their contribution to mission success or failure. Include recommendations for new or revised controls, practical solutions, or alternate actions. Submit and brief valid lessons learned as outlined in CAPR 160-1.</p>
	<p><b>Additional Guidance:</b> Use CAPF 160HL if additional rows are needed for hazard assessments.</p>
