

# ARKANSAS WING SAFETY

## Electronic Safety.

Let's all take a moment this month to check the settings on our antivirus software and firewall settings. Often, we set these up and forget about them as they run in the background.

## Vehicle Safety.

If you have a garage and are warming up your car, crack the door before you do so. Yes, it may be cold, but it also may save your life.

## Seasonal Safety.

Groundhog may report 6 more weeks of winter, but we live in Arkansas, so the weather will change every 15 minutes or so. Make sure you have the correct clothing for all the possible conditions you may encounter.

## Home Safety.

If you are using space heaters, ensure 1) you have plenty of ventilation and 2) there are no flammable items that can be caught on fire by them.

## Personal Safety.

Do not have conversations with "wrong number" callers. Never give any information about yourself to someone who reaches you at a "wrong number;" callers might not have actually dialed you by accident - they may be criminals seeking information in an attempt to target you for identity theft or worse.

## Flying Safety.

Review your cold weather operations. Planes do not fly with ice on them.
